Please add as much information as you can, here are some suggestions. CAS

Vince,

Sandy Beach – I guess we use the ROD estimate for future cost and say that the cleanup, once completed will protect drinking water source, etc.

For Circle Court – Say that we are in the early stages of determining the nature and extent of contamination for source and ground water. Make a conservative estimate for future RI/RS and RD/RA costs. Goal is to protect drinking water source for private and city.

Gary

San Jacinto – PRP lead. Completing RI/FS and will select a remedy to protect XXX.

Philip

Patrick Bayou – PRP lead. Completing RI/FS and will select a remedy to protect XXX.

David

Texarkana Wood – Completed the cleanup in September 2012. Remedy will protect XXX and prevent ground water migration to the xxx creek that drains to xxx river.

Also, Pam has asked that these site write-ups include more information on funding spent to date, or funding that may be needed in the future, what we have accomplished to date, significance of the cleanup.

Donn,

We have identified our sites that fall within the districts of members on the congressional committees. Based on this list from the 6SF-RL section, I would put forward Homestake, UNC, and Chevron Questa as the hot sites. Let us know when we need write ups.

We will send a separate email for the TX/AR sites.

**Subject:** 2014 Appropriation Hearing Data Call - Hot Topics

Directors:

This is a preliminary call for hot topics only to begin preparations for congressional hearings in April on EPA's FY14 budget. At this time we are collecting topics only (see the attachment for what we propose so far) . Cynthia Fanning of our staff will reach out to your Division contacts to provide input by noon on Wednesday.

Additional information may be due once HQ reviews the submissions. As you recall, we always formulate this request around members of the committees.

Let us know if you have any questions.

Diane
